## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 5, it is not understood whether the new limitation, "a plurality of memory cells are stacked on top of one another over the semiconductor substrate and each use the island like semiconductor layer" refers to the same plurality of memory cells previously recited in the claim or another plurality of memory cells. Clarity is required to better define the claimed subject matter herein.

### *Allowable Subject Matter*

Claims 1, 3, 7-9, 11-19, 29, 31-44, 46, 49-51, 53 and 55-57 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The reference (s) of record do not teach or suggest, either singularly or in combination at least the limitation of "wherein a lower gate electrode of a first selection transistor, the control gate of the memory cell, and an upper gate electrode of a second selection transistor are arranged in an upward order in a direction vertical to the semiconductor substrate, so that the first and the second selection transistors are

located on opposite vertical sides of the memory cell in a vertical direction" for claim 1; "wherein a gate electrode for selecting a memory cell is formed at least at an end of the memory cell formed on the island like semiconductor layer so as to partially or entirely encircle the sidewall of the island like semiconductor layer and the gate electrode is arranged in series with the memory cell" for claim 9; "wherein a plurality of memory cells are stacked on top of one another over the semiconductor substrate and each use the island like semiconductor layer, and wherein respective active regions of each of the memory cells are electrically insulated from the semiconductor substrate" for claims 36 and 46; "wherein a lower gate electrode of a first selection transistor, control gates of a plurality of memory cells, and an upper gate electrode of a second selection transistor are arranged in an upward order in a direction vertical to the semiconductor substrate, so that the first and second selection transistors are located on opposite vertical sides of the plurality of memory cells in a vertical direction so as to sandwich the plurality of memory cells there between.

### ***Response to Arguments***

Applicant's arguments with respect to claim 5 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2815

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
